‡ The MSCI World Index is a free float-adjusted market capitalization index that is designed to measure global developed market equity performance. The MSCI World Index consists of 23 developed market country indices.

The Barclays Capital Global Aggregate Bond Index covers the most liquid portion of the global investment grade fixed-rate bond market, including government, credit and collateralized securities. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AllianceBernstein fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.
