AB AMERICAN INCOME PORTFOLIO

OBJECTIVE & STRATEGY

Seeks to provide a high level of current income consistent with preservation of capital by:

- + Employing a US dollar-denominated multi-sector bond approach in search of the best opportunities
- + Dynamically balancing credit and duration through investments in high yield and emerging market sectors to enhance income and dampen interest-rate risk, and in high-quality government bonds to alleviate credit risk when markets are stressed
- + Limiting exposure to below investment-grade rated bonds to 50% and avoiding CCC-rated issuers

ONGOING CHARGES FIGURE

Class	
A	1.32%
C	1.77
I	0.77
A2	1.32
NT	1.87
AT CAD H	1.32

Ongoing charges include fees and certain expenses of the Portfolio as of the most recent KIID, and may be subject to a cap which is reflected above if applicable.

Past performance is no guarantee of future results. The value of investments and the income from them will vary. Your capital is at risk. Performance data are provided in the share class currency, and include the change in net asset value and the reinvestment of any distributions paid on Portfolio shares for the period shown. Performance data are net of management fees, but do not reflect sales charges or the effect of taxes. Returns for other share classes will vary due to different charges and expenses.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

The Portfolio is a portfolio of AB FCP I, a mutual investment fund (fonds commun de placement) organized under the laws of Luxembourg.

HYPOTHETICAL GROWTH OF \$10,000

Hypothetical growth of \$10,000 is for illustrative purposes only. Fund returns assume the reinvestment of distributions and do not reflect a sales charge. Results would be less favorable if a sales charge were included.

INVESTMENT RISKS TO CONSIDER: Investment in the Fund entails certain risks. Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Dividends are not paid for all share classes and are not guaranteed. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include liquidity risk, focused portfolio risk, portfolio turnover risk, derivatives risk, OTC derivatives counterparties risk, structured investments risk, fixed income securities risk, lower-rated and unrated instruments risk, sovereign debt obligations risk and corporate debt obligations risk. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.

This financial promotion is directed solely at persons in jurisdictions where the funds and relevant share class are registered or who may otherwise lawfully receive it. Before investing, investors should review the Fund's full Prospectus, together with the Fund's Key Investor Information Document and the most recent financial statements. Copies of these documents, including the latest annual report and, if issued thereafter, the latest semi-annual report, may be obtained free of charge from AllianceBernstein (Luxembourg) S.à r.l. by visiting www.alliancebernstein.com, or in printed form by contacting the local distributor in the jurisdictions in which the funds are authorised for distribution.

1 Effective 1 January 2008, the benchmark for the Portfolio has changed as noted. Benchmark performance prior to this date, represents the Portfolio's prior blended benchmark, which consisted of 50% Merrill Lynch US Government Index/35% JPMorgan EMBI (Emerging Markets Bond Index) Global/15% Merrill Lynch US High Yield Index.

2 The Bloomberg Barclays US Government Bond Index is the government-related component of the US Aggregate Bond Index. The Bloomberg Barclays US Aggregate Bond Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the US investment grade fixed rate bond market. The JPMorgan EMBI (Emerging Markets Bond Index) Global tracks total returns for US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities. The Bloomberg Barclays US High Yield 2% Constrained Index covers the universe of fixed rate, non-investment grade debt. The Index is the 2% issuer capped component of the US Corporate High Yield Index. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

3 Net asset value is denominated in the share class currency.

4 The highest of S&P, Moody's and Fitch. Not rated securities are those rated by another nationally recognized statistic rating organization and/or AB. Credit quality is a measure of the creditworthiness and risk of a bond or portfolio, based on the issuer's financial condition. AAA is highest and D is lowest. Ratings may not accurately reflect credit risk and are subject to change.

Morningstar ratings are only shown for the fund's base share class with a 4- or 5-star rating. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.
