‡ The MSCI World Index is a free float-adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 24 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. An investor cannot invest directly in an index, and index results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

Past performance is no guarantee of future results. Total returns, provided by AB, include the change in Net Asset Value and reinvestment of any distributions paid on Portfolio shares for the period shown, but do not reflect sales charges. Fund returns are annualized for periods longer than one year. Performance quoted in currencies other than the base currency of the Portfolio is calculated by converting the daily Net Asset Value of the Portfolio using a spot foreign exchange rate of the other offered currency on each valuation point. The information on this page is for informational purposes only and should not be construed as an offer to sell, or solicitation of an offer to buy, or a recommendation for the securities of the Portfolio. Returns denominated in a currency other than that of the fund may increase or decrease as a result of foreign exchange currency fluctuations.
