

Emerging Markets Debt Portfolio

Portfolio Objective and Strategy

The Portfolio seeks to maximize total returns from price appreciation and income by investing in sovereign debt obligations and non-U.S. corporate fixed-income securities from issuers in emerging and developing countries. The Portfolio invests in both U.S. dollar and non-U.S. dollar denominated securities. A significant portion of the portfolios assets may be held in below investment grade securities at any time. The Investment Manager utilizes the research of its global fixed income, global economic, and global credit teams in managing the Portfolio.

‡ The unmanaged JPMorgan EMBI (Emerging Markets Bond Index) Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, eurobonds. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

¹ Since inception performance is from inception date of Class A. See footnotes on page 1 for inception dates.

² Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely. Stand-alone currency symbols represent convenience pricing, which offers the ability to purchase or redeem shares using the currency indicated, which is then converted into the base currency of the portfolio using a market rate at the time of purchase or redemption. Convenience pricing involves no currency hedging and does not seek to provide any protection from currency fluctuations.

Past performance is no guarantee of future results. Total returns, provided by AB, include the change in Net Asset Value and reinvestment of any distributions paid on Portfolio shares for the period shown, but do not reflect sales charges. Fund returns are annualized for periods longer than one year. Performance quoted in currencies other than the base currency of the Portfolio is calculated by converting the daily Net Asset Value of the Portfolio using a spot foreign exchange rate of the other offered currency on each valuation point. The information on this page is for informational purposes only and should not be construed as an offer to sell, or solicitation of an offer to buy, or a recommendation of the securities of the Portfolio. Returns denominated in a currency other than that of the fund may increase or decrease as a result of foreign exchange currency fluctuations.

Investment in the Fund entails certain risks. Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Dividends are not paid for all share classes and are not guaranteed. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include country risk, emerging markets risk, currency risk, currency hedged share class risk, illiquid assets risk, focused portfolio risk, allocation risk, portfolio turnover risk, management risk, lack of operating history risk, derivatives risk, borrowing risk, taxation risk, fixed income securities risk, interest rate risk, lower rated and unrated investments risk, prepayment risk, sovereign debt obligations risk, corporate debt risk and lower-or unrated securities risk. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.

This information is directed solely at persons in jurisdictions where the funds and relevant share class are registered or who may otherwise lawfully receive it. Before investing, investors should review the fund's full prospectus, together with the fund's Key Investor Information Document (KIID) and the most recent financial statements. Copies of these documents, including the latest annual report and, if issued thereafter, the latest semi-annual report, may be obtained free of charge from AllianceBernstein (Luxembourg) S.à r.l., by visiting www.abglobal.com or in printed form by contacting the local distributor in the jurisdictions in which the funds are authorized for distribution.
