ONGOING CHARGES FIGURE

Class	
A	1.35%
C	1.80
I	0.80
A2	1.35
NT	1.90

Ongoing charges include fees and certain expenses of the Portfolio as of the most recent KIID, and may be subject to a cap which is reflected above if applicable.

HYPOTHETICAL GROWTH OF \$10,000

Hypothetical growth of \$10,000 is for illustrative purposes only. Fund returns assume the reinvestment of distributions and do not reflect a sales charge. Results would be less favorable if a sales charge were included.

STATISTICAL DATA (CLASS A USD)

	3 Years
Volatility	6.97

Past performance is no guarantee of future results. The value of investments and the income from them will vary. Your capital is at risk. Performance data are provided in the share class currency, and include the change in net asset value and the reinvestment of any distributions paid on Portfolio shares for the period shown. Performance data are net of management fees, but do not reflect sales charges or the effect of taxes. Returns for other share classes will vary due to different charges and expenses.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

The Portfolio is a portfolio of AB FCP I, a mutual investment fund (fonds commun de placement) organized under the laws of Luxembourg.

INVESTMENT RISKS TO CONSIDER: Investment in the Fund entails certain risks. Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Dividends are not paid for all share classes and are not guaranteed. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include emerging markets risk, liquidity risk, focused portfolio risk, allocation risk, portfolio turnover risk, derivatives risk, OTC derivatives counterparties risk, structured investments risk, fixed income securities risk, lower-rated and unrated instruments risk, sovereign debt obligations risk and corporate debt obligations risk. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.

This financial promotion is directed solely at persons in jurisdictions where the funds and relevant share class are registered or who may otherwise lawfully receive it. Before investing, investors should review the Fund's full Prospectus, together with the Fund's Key Investor Information Document and the most recent financial statements. Copies of these documents, including the latest annual report and, if issued thereafter, the latest semi-annual report, may be obtained free of charge from AllianceBernstein (Luxembourg) S.à r.l. by visiting www.alliancebernstein.com, or in printed form by contacting the local distributor in the jurisdictions in which the funds are authorised for distribution.

1 The JPMorgan EMBI (Emerging Market Bond Index) Global Diversified is comprised of USD-denominated emerging markets sovereign debt. It has a distinct distribution scheme which allows a more even distribution of weights among the countries in the index by only including a specified portion of those countries' eligible current face amounts of debt outstanding. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.
 2 Life performance is from inception date of oldest class shown. See page 1 for inception dates.
 3 Net asset value is denominated in the share class currency.
 4 Credit Quality is a measure of the creditworthiness and risk of a bond or portfolio, based on the issuer's financial condition. For purposes of this document, all ratings are based on ratings of S&P, Moody's and Fitch: AAA/Aaa is highest and D is lowest. **Conventions for split ratings:** Sector Allocation/High Yield uses a split to lower with two different ratings (and a split to middle for three ratings); Credit Quality uses a split to higher. Therefore, information contained herein may be different where the Prospectus requires a different split ratings convention or, where the Prospectus does not specify, AB applies its own split ratings convention.

Note to Canadian Readers: AllianceBernstein provides its investment-management services in Canada through its affiliates Sanford C. Bernstein & Co., LLC and AllianceBernstein Canada, Inc. Morningstar ratings are only shown for the fund's base share class with a 4- or 5-star rating. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.
