

AB EUROPEAN EQUITY PORTFOLIO

OBJECTIVE & STRATEGY

- + Investing in stocks of companies throughout Europe that offer compelling long-term return potential and attractive valuations
- + Taking a long-term perspective in order to capitalize on short-term market inefficiencies created by investors' overreaction to macroeconomic, industry, or company-specific concerns

Past performance is no guarantee of future results. The value of investments and the income from them will vary. Your capital is at risk. Performance data are provided in the share class currency, and include the change in net asset value and the reinvestment of any distributions paid on Portfolio shares for the period shown. Performance data are net of management fees, but do not reflect sales charges or the effect of taxes. Returns for other share classes will vary due to different charges and expenses.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

The Portfolio is a sub-fund of AB SICAV I, an open-ended investment company with variable capital (société d'investissement à capital variable) incorporated under the laws of the Grand Duchy of Luxembourg.

1 The MSCI Europe Index is a free float-adjusted market capitalization index that is designed to measure developed-market equity performance in Europe. The MSCI Europe Index consists of 16 developed-market country indices. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.
2 Life performance is from inception date of oldest class shown. See page 1 for inception dates.
3 Net asset value is denominated in the share class currency.
4 Excludes sectors with no portfolio holdings.

Note to Canadian Readers: AllianceBernstein provides its investment-management services in Canada through its affiliates Sanford C. Bernstein & Co., LLC and AllianceBernstein Canada, Inc. Morningstar ratings are only shown for the fund's base share class with a 4- or 5-star rating. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.
