RISK & REWARD PROFILE

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Portfolio may perform and the risk of losing some or all of your capital. The SRRI is from the most recent KIID, available from our website, and may be subject to change.

GROWTH OF \$10,000

Past performance does not guarantee future results. The performance shown above is net of ongoing charges and assumes an investment of \$10,000 at inception of the share class, on which an investor may pay a sales charge of up to 5%. If this charge were deducted from the initial investment, an investor would need to pay \$10,527 in order to achieve an investment of \$10,000. For investors, other personal securities portfolio costs (e.g., custody fees), if applicable may further reduce performance.

1 The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

2 Yields are calculated based on the latest available distribution rate per share for a particular class. The yield is not guaranteed and will fluctuate.

3 For distributing classes, a Portfolio may pay dividends from gross income (before reduction for fees and expenses), realized and unrealized gains, and capital attributable to the relevant class. Investors should note that distributions in excess of net income (gross income less fees and expenses) may represent a return of the investor's original investment amount and as such may result in a decrease in the net asset value per unit for the relevant class. Distributions out of capital may be taxed as income in certain jurisdictions.

4 Net asset value is denominated in the share class currency.

5 This is the maximum figure; the entry charge may be less than this.

6 Excludes sectors with no portfolio holdings.

INVESTMENT RISKS TO CONSIDER These and other risks are described in the Portfolio's prospectus.

Investment in the Portfolio entails certain risks. Investment returns and principal value of the Portfolio will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Some of the principal risks of investing in the Portfolio include:

Focused Portfolio Risk: Investing in a limited number of issuers, industries, sectors or countries may subject the Portfolio to greater volatility than one invested in a larger or more diverse array of securities.

Portfolio Turnover Risk: A portfolio may be actively managed and turnover may, in response to market conditions, exceed 100%. A higher rate of portfolio turnover increases brokerage and other expenses. High portfolio turnover may also result in the realization of substantial net short-term capital gains, which may be taxable when distributed.

Derivatives Risk: The Portfolio may include financial derivative instruments. These may be used to obtain, increase or reduce exposure to underlying assets and may create gearing; their use may result in greater fluctuations of the net asset value.

OTC Derivatives Counterparty Risk: Transactions in over-the-counter (OTC) derivatives markets may have generally less governmental regulation and supervision than transactions entered into on organized exchanges. These will be subject to the risk that its direct counterparty will not perform its obligations and that the Portfolio will sustain losses.

Equity Securities Risk: The value of equity investments may fluctuate in response to the activities and results of individual companies or because of market and economic conditions. These investments may decline over short- or long-term periods.

Dividends are not paid for all share classes and are not guaranteed. The Portfolio is meant as a vehicle for diversification and does not represent a complete investment program. Before making an investment decision, prospective investors should read the prospectus carefully and discuss risk and the Portfolio's fees and charges with their financial adviser to determine if the investment is appropriate for them. This financial promotion is directed solely at persons in jurisdictions where the funds and relevant share class are registered or who may otherwise lawfully receive it. Investors should review the Portfolio's full Prospectus, together with the Portfolio's Key Investor Information Document and the most recent financial statements. Copies of these documents, including the latest annual report and, if issued thereafter, the latest semi-annual report, may be obtained free of charge from AllianceBernstein (Luxembourg) S.à r.l. by visiting www.alliancebernstein.com, or in printed form by contacting the local distributor in the jurisdictions in which the funds are authorised for distribution.

Investors are encouraged to consult their independent financial advisors regarding the suitability of Shares of the Portfolio for their investment needs.

Past performance does not guarantee future results.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations. Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the Portfolio's base currency. The goal is to deliver returns that track the Portfolio's base currency returns more closely.
