

This Product Highlights Sheet is an important document.

- It highlights the key terms and risks of the Global High Yield Portfolio (the "Portfolio"), a portfolio of AllianceBernstein<sup>1</sup> (the "Fund"), and complements the prospectus for the Fund (the "Prospectus") and the Singapore prospectus (the "Singapore Prospectus", together with the Prospectus, the "Singapore Offering Documents").<sup>2</sup>
- It is important to read the Singapore Offering Documents before deciding whether to purchase shares in the Portfolio ("Shares"). If you do not have a copy, please contact us to ask for one.
- You should not invest in the Portfolio if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase Shares, you will need to make an application in the manner set out in the Singapore Prospectus.

<b>KEY PRODUCT FEATURES</b>	
<p><b>WHAT ARE YOU INVESTING IN?</b></p> <ul style="list-style-type: none"> <li>You are investing in a portfolio of a mutual fund domiciled in Luxembourg and regulated by the <i>Commission de Surveillance du Secteur Financier</i>.</li> <li>The investment objective of the Portfolio is to produce high current income as well as overall total return.</li> <li>The Management Company intends to declare dividends on a daily basis in respect of Class A, B, C and I Shares, and monthly in respect of Class AT, BT and CT Shares (and in each case their corresponding currency hedged Share classes), and to pay such dividends monthly in an amount equal to all or substantially all of the Portfolio's net income attributable to each class of Shares. The Management Company currently does not intend to declare a dividend in respect of other Share classes and any net income and net realised profits attributable to such Shares will be reflected in the respective NAV of the Shares.</li> </ul>	Refer to the heading " <i>Investment Objective, Focus and Approach</i> " in the Singapore Prospectus and " <i>Other Portfolio Information: Distributions</i> " in the Prospectus relating to the Portfolio for further information on the key product features.
<b>Investment Strategy</b>	
<p><b>STRATEGY</b></p> <ul style="list-style-type: none"> <li>The Portfolio invests at least two-thirds of its assets in high yielding debt securities of issuers located throughout the world, including the US and emerging-market countries. The Portfolio intends to allocate its assets among three main types of investments: (i) high yielding non-Investment Grade debt securities of U.S. corporate issuers; (ii) non-Investment Grade debt securities of issuers located in emerging market countries; and (iii) sovereign debt obligations issued by emerging market countries. However, the Portfolio is not prohibited from investing in other types of debt securities as the Investment Manager deems appropriate. The Portfolio may invest in debt securities denominated in US dollars or local currencies. Holdings may include debt-securities with a range of maturities, from short to long-term.</li> <li>The Portfolio may use derivatives for efficient portfolio management ("EPM") or hedging purposes and to manage duration.</li> </ul>	Refer to " <i>Investment Objective and Policies</i> " in the Prospectus relating to the Portfolio for further information on the investment strategy.
<b>Parties Involved</b>	
<p><b>WHO ARE YOU INVESTING WITH?</b></p> <ul style="list-style-type: none"> <li>The Investment Manager for the Portfolio is AllianceBernstein L.P., a Delaware limited partnership.</li> <li>Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed to act as Administrator and Custodian.</li> </ul>	Refer to " <i>Management and Administration</i> " of the Prospectus for further information on their roles and responsibilities.
<b>KEY RISKS</b>	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p><b>The value of investments and the income from them, and therefore the value of and income from Shares of the Portfolio, can go down as well as up and you may not get back the amount you invest.</b></p> <p><b>These risk factors, among others, may cause you to lose some or all of your investment:</b></p>	Refer to " <i>Risks</i> " of the Singapore Prospectus for further information on the risks of investing in the Portfolio.
<b>Market and Credit Risks</b>	
<p><b>You are exposed to global Country Risks.</b> Investments in issuers located in a particular country or geographic region may have more market, political and economic risks because of particular factors affecting that country or region.</p> <p><b>You are exposed to Currency Risks.</b> Currency movements in the underlying investments of a portfolio that is denominated in a currency different from that of the portfolio itself may significantly affect the NAV of that portfolio.</p> <p><b>You are exposed to Credit Risks.</b> The Portfolio will invest in fixed-income securities (including bonds) issued by companies and other entities and the Portfolio will be subject to the risk that a particular issuer may not fulfil its payment or other obligations in respect of such fixed-income securities. Generally, debt instruments with a lower credit rating or that are unrated are more susceptible to the credit risk of the issuers. In the event of a default or credit rating downgrading of the issuers of the fixed income securities, the Portfolio's value may be adversely affected and investors may suffer a</p>	

<p>substantial loss as a result.</p> <p><b>You are exposed to Emerging Markets Risks.</b> The Portfolio will invest in emerging markets, which are subject to higher risks (for example, liquidity risk, currency risk, political risk, regulatory risk and economic risk) and higher volatility than portfolios investing in developed markets. Fluctuations in currency exchange rates may negatively affect the value of the investment or reduce returns - these risks are magnified in emerging or developing markets.</p>	
<b>Liquidity Risks</b>	
<p><b>You are exposed to liquidity risks of the underlying fund's investments.</b> Investments in illiquid assets or assets which become illiquid could prevent the Portfolio from promptly liquidating unfavourable positions and, therefore, result in losses to the Portfolio and corresponding decreases in the NAV of the Shares.</p> <p><b>The Shares are not listed and can only be realised on Business Days.</b> There is no secondary market for the Shares. All realisation requests should be submitted in the manner set out in the Singapore Prospectus.</p> <p><b>You may not be able to redeem when a redemption limit is imposed or when redemption is suspended.</b> A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances.</p>	
<b>Product-Specific Risks</b>	
<p><b>You are exposed to Derivatives Risks.</b></p> <ul style="list-style-type: none"> <li>The Portfolio is entitled to use derivative instruments for hedging and EPM purposes and to manage duration which may involve additional risks different from, and, in certain cases, greater than, the risks presented by more traditional investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk and leverage risk.</li> <li>In adverse situations, the Portfolio's use of derivative instruments may become ineffective in hedging or EPM or managing duration and the Portfolio may suffer significant losses.</li> <li>The failure of a counterparty to a derivative contract to comply with the terms of that contract could cause the Portfolio to suffer a loss.</li> </ul> <p><b>You are exposed to Fixed Income Securities Risk.</b></p> <ul style="list-style-type: none"> <li>The NAV of a portfolio invested in fixed-income securities will change in response to fluctuations in interest rates and currency exchange rates, as well as changes in credit quality of the issuer.</li> <li>Lower-rated securities and unrated securities of comparable quality may be subject to wider fluctuations in yield and market values than higher-rated securities.</li> </ul>
